

CAPABILITIES & EXPERIENCE

With a reputation built by taking on some of the toughest Federal projects, Enfield Enterprise’s highly skilled professional staff leveraged with our extensive construction experience gives Enfield the capacity to perform construction projects safely and simultaneously in many regions throughout the United States. Our success is the result of more than 38 years of delivering construction projects on time and under budget based on trusted relationships founded on transparency, collaboration, and commitment.

Enfield Enterprises is a certified Historically Underutilized Business Zones (HUBZone) Small Business. Headquartered in Springfield, Massachusetts. Enfield Enterprises maintains regional offices throughout the nation including Alabama, Florida, and New York. Throughout the past 38 years, Enfield Enterprises has had the privilege of serving as the prime contractor for the Federal Government. Over the past five years alone, Enfield Enterprises has successfully completed multi-discipline construction projects ranging from \$15,000 to \$26 million dollars for both private clients and branches of the Federal Government.

PROJECT TEAM

Enfield Enterprises approaches each opportunity with the primary objective of selecting the right team to perform. The team structure for this project would include prior storm experienced management staff consisting of Daniel Eastman (President/ Operations Manager) Peter Baruffaldi (VP of Operations) Patrick Porter (Subcontractor Management) and Corey Adams (Project Manager), Site Superintendents, Quality Control Manager, vendors, and subcontractors who have proven their value through past work with Enfield Enterprises. Additionally, Enfield Enterprises maintains carpenters and general construction laborers to perform a wide range of construction activities from demolition to framing and finish construction.

Enfield Enterprises is committed to exceeding client expectations on every project. Our team focuses on the completion of each project on time and on budget, accomplishing this by successfully meeting milestones and promptly addressing any client needs/concerns or project issues as they arise. Project managers hold weekly coordination meetings with site superintendents and subcontractors in order to maintain the project schedule. On site coordination between the subcontractors is managed by the Site Superintendents who utilizes a detailed two week look ahead outlining tasks and project progress. Weekly meetings with the client allow Enfield Enterprises to confirm project progress and outline weekly activities, keeping the client up to date with the schedule.

QUALITY

Constant quality is result of commitment and participation by every project participant; this includes owner, general contractor, subcontractors, and designers. Enfield Enterprises will bring a rigorous approach to achieve advanced long-term quality and high-performance goals established by the project. Under leadership of CQCM (Construction Quality Control Manager), Gary Pacitto, Enfield Enterprises has implemented a corporate-wide Quality Management Program which is modeled on stringent construction quality requirements of the U.S. Army Corps of Engineers standards. He will be responsible for each designated team; providing each team leader with guidance such as reviewers, the DQCM, inspectors, and testing personnel, and responsible for the overall quality activities of the project and will oversee all construction quality assurance for the 3-Phases of Control and prepare all of the authority required to act on all matters on Enfield Enterprises' behalf.

Experience

Since 2004, Enfield Enterprises has been a trusted Advanced Contract Initiative Contractor (ACI) for the Army Corps of Engineers providing large volume Temporary Roof Coverings in a short period after well-known storms Charlie, Katrina, Ike, Irma, Maria, Michael, Ida and more. Enfield Enterprises has demonstrated their ability to quickly mobilize large-scale management and labor teams to provide immediate response to disaster efforts. Enfield Enterprises has completed nearly \$100M in Emergency Construction and Repairs such as Temporary Housing, Tree Removal, Temporary Roofing, Rooftop Snow Removal, Emergency Dry-In, Demolition, HVAC and MEP Repairs, solidifying our position as a reliable Disaster Response Contractor. With ongoing disaster relief response contracts, Enfield Enterprises maintains a network of companies capable of responding to emergency situations with complexity and scopes varying. Many of our working relationships go back 10+ years or more.

Enfield Enterprises has a proven track record of successfully managing multiple disaster response missions over a several year span. As recently as October 2021, Enfield Enterprises worked with KBR at the Dona Ana Range Complex in New Mexico to support temporary support facilities for the Afghanistan refugees. During this time Enfield Enterprises supported Swan Contracting LLC managing the ACI temporary response mission in New Orleans in response with USACE to hurricane Ida.

Additionally, Enfield Enterprises worked with KBR and the United States Air Force at Tyndall AFB. Enfield Enterprises was contracted to repair the buildings that were destroyed by Hurricane Michael. Enfield Enterprises and teaming partners completed \$100M in relief in under (6) months with KBR. Following Hurricane Michael, Enfield Enterprises was contracted by KBR at the same location to perform building restoration services to make the base operational again. Enfield Enterprises has been at Tyndall on base working since November 2018 and have performed work on approximately 80 buildings. Enfield Enterprises has performed intermediate roofing repairs, building envelope restorations as well as HVAC system repair and replacements. Additionally, Enfield Enterprises has worked closely with KBR and the Air Force in order to complete many specialty coordination intensive projects including the restoration of multiple Aircraft Hangars and the interior fit out of Air Traffic Control Tower completing over \$25 million of work in 6 months.

RESPONSIVENESS

Ready For Deployment: Enfield Enterprises has existing contracts with strategic partners across the country to deliver unmatched responsiveness for rapid project deployment, supplying mission critical equipment and services such as:

- ✓ Living accommodations (tents, trailers, RVs)
- ✓ Supply Trailers
- ✓ Generators
- ✓ Lighting sets
- ✓ Cleaning and Sanitization Supplies
- ✓ Storage Facilities
- ✓ Potable Water Storage
- ✓ Modular Housing Units
- ✓ Reefers / Freezers
- ✓ Labor and Management

Enfield Enterprises support goes beyond simply reacting to a situation, they take a proactive approach to emergency response. Every year Enfield Enterprises along with their network of companies actively watch weather patterns and activity to anticipate what if any event may occur. They coordinate closely to pre plan logistical routes, manpower, and life support elements needed to be able to respond to the expected response location. They work closely with utility providers as well, and often they will begin staging with the utility companies in an area close to the expected impact site prior to the actual event. This allows Enfield Enterprises the ability to be one of the first companies on site. They can quickly assess the situation to estimate the level of response that will be required often several hours before the requirements are issued. This proactive approach allows them to begin early planning and staging of assets in anticipation of the resources being requested.

Enfield Enterprises is capable of developing and executing a response plan designed to meet the needs of global disasters seen throughout the world today. Enfield Enterprises stand ready to support immediate deployment needs which they demonstrate throughout the mobilization plan, experience, qualifications, resources, service history, and proposed lower tier subcontractors.

Enfield Enterprises and teaming partners have identified opportunities that are complementary and can provide meaningful development to Perini Management Services and Various Disaster Relief and Emergency Services. Enfield Enterprises can provide some of the most responsive and reactive emergency response capabilities available in the country today. Their collective experience with KBR, USACE, FEMA, and additional stakeholders in disaster response combined with their extensive network of suppliers, and labor resources allow them to respond quickly and efficiently to disaster situations globally. Their services are as diverse as the environments they operate in and can easily be structured as a complete turn-key scenario, or an ala carte designed specifically to the situation.

Based on Enfield Enterprises experience obtained through responding to emergency disasters cited in service history section, Enfield Enterprises has developed and implemented multiple procedures for their disaster response processes. Many of these procedures continuously improve the systems that support daily operations. From these procedures they have the capabilities to provide a timely response to natural disasters.

Enfield Enterprises capabilities include:

- ✓ Development and implementation standard operating procedures with integrated priority software will be used to process, categorize, and plot Task Order assignments to minimize time-on-the-road and optimize time-on-the-job for work crews each day.
- ✓ Established Lines of Credit to ensure securement of needed items and material.
- ✓ Deployment of living accommodations capable of providing temporary housing, sanitary, and storage space for personnel deployed into disaster locations devoid of serviceable hotels, restaurants, and/or utility services.
- ✓ Deployment of multiple gas-powered generators to provide electrical power requirements in areas without electrical service.
- ✓ Deployment of our mobile VSAT system to provide Enfield Enterprises personnel at the field production office with voice, video, and data communications in areas where the storm disrupted or destroyed normal telecommunications.
- ✓ Deployment of our satellite phone systems called First Net through AT&T to establish reliable communication between Enfield Enterprises project personnel in locations where the storm has destroyed normal cellular communications.
- ✓ Established network of sources to support Enfield Enterprises on natural disaster response like RANCO Response, First Onsite, Big Top Shelters, and Sunbelt Rentals.
- ✓ Readily identifiable photo ID cards and maroon colored Enfield Enterprises shirts are issued to every employee and subcontractor mobilized under all relief efforts.
- ✓ Food Service Certifications – Serve-safe (Sanitation).
- ✓ Within 24 Hours before Issuance of Task Order Enfield Enterprises will submit the following items to the COR:
 - Preplanning if needed
 - List of Key Personnel / Organization Chart
 - COI – Certificate of Insurance
 - APP / Safety Plans – Accident Prevention Plans / Drug-free workplace policies
 - List of subcontractors
 - Affirmative Action Plans
 - Quality Control Plans
 - Evidence of local license / Permits

Resources

Enfield Enterprises' extensive network of resources and subcontractors allows for instant acquisition and provides the ability and support to immediately deploy and setup temporary facilities simultaneously for when a natural disaster occurs. Enfield Enterprises resources will also support additional areas of responsibility when a natural disaster hits like setting up base camps that include trailers, structure tents, power generation, HVAC, catering services, hygiene and sanitation stations, and restroom trailers. Base camp laundry staff and services

can be set up 48 hours after arrival onsite. Additional base camp services when needed will include camp management, on-site management and/or security, command center/EOC support, maintenance staffing, generators, climate control, refrigeration, technicians, and logistical staff. These resources have extensive experience providing professional services like site design and layout, logistics training, pandemic compliance, and after-action reviews that they can further support the Enfield Enterprises team on.

SAFETY IS A PROJECT NON-NEGOTIABLE

As part of our role for providing Construction Phase Services, Enfield Enterprises will support all safety and accident prevention activities on site. As such, safety will be a top priority for Enfield Enterprises throughout the construction process. Our team will review all project-specific safety plan to absolutely safeguard all workers as well as the employees from hazardous situations. We will also be responsible for the performance of all safety inspections when called upon.

Enfield Enterprises exceeds OSHA and EM385 requirements in just about every category and our leadership has created a culture of safety with every person in the company, from executives to all field personnel. The success of Enfield Enterprises' comprehensive approach to safety is demonstrated in our **0.79** Experience Modification Rating (EMR). **We ensure all work on Task Order Awarded Sites will be performed in strict accordance with all state, local, and federal requirements and 100% adherence to the U.S. Army Corps of Engineers Manual, EM385-1-1.**

OCCUPIED ENVIRONMENTS: PHASING & LOGISTICS PLANNING

Closely linked with Safety, phasing and logistics planning requires a highly detailed approach to minimize the impacts of projects on occupants and neighbors alike. Maintaining a safe and secure site both outside and inside of the construction limits is essential and requires constant attention throughout construction. Our project staff works closely with all team members and stakeholders to ensure project phasing is executed with minimal impacts to the occupants. Having completed countless phased-renovation projects over the years, we understand communication is paramount to every phasing strategy. Our plans are developed with the input from all team members as well as any additional operations agencies and departments, including police, fire, and private security. Draft plans are then presented for the review and approval by all involved stakeholders to finalize the plan prior to construction. It is our mission to keep people informed and safe which is why we communicate all work with the project team clearly, and in advance to ensure all life safety signage and egress routes are maintained at all times.

Thank you for your consideration. We look forward to the opportunity to provide you with Construction Management services.

Original Start & Completion: 10/02/2021 thru 02-14/2022
Final Start & Completion: 10/02/2021 thru 01/14/2022

Project Description:

Enfield Enterprises supported KBR at the Dona Ana Range Complex in New Mexico during the 2021 Afghanistan Refugee Crisis. Nearly 777,400 Afghans were displaced across the county, approximately 10,000 arriving at the Dona Ana Range Complex needing shelter, food, water, along with several other temporary support facilities. Enfield Enterprises provided and maintained 20 cold and 10 dry storage to support rations for 8-day ration cycle, units were 54 ft Trailers. From October to mid-December was the peak of services with all 30 units being used with an additional 4 onsite being used as needed. By the tail end of December, reefers began to be descoped with services concluding by January. With most refugees finding alternative options, the period of performance ended sooner than anticipated. Enfield Enterprises provided onsite, on call management and supervision 24/7 as most disaster relief work requires.

Enfield Enterprises was able to support another disaster relief program with KBR continuing their success.

Project Name: Hurricane Michael Relief

Location: Tyndall AFB, Florida

Contract Number: FA8051-15-D-0004

Role: Prime Contractor

Start & End: 11/2018 to 12/2019

Project Description:

Hurricane Michael made landfall as a Category 5 tropical cyclone hurricane with maximum sustained winds of 160 MPH at 3:30 EDT on October 10, 2018 near Tyndall Air Force Base in Panama City, Florida. It was the third-most intense Atlantic hurricane to make landfall in the contiguous United States since the 1935 Labor Day hurricane and Hurricane Camille of 1969. Tyndall AFB sustained devastating wind damage after being directly impacted by the hurricane's violent eyewall. Every structure on the base sustained damage, and some were completely destroyed by the intense winds.

After engaging with KBR (Air Force Catastrophe Service Contractor from Houston, TX) to become a qualified vendor, Enfield Enterprises reported to Tyndall AFB on November 11, 2018 to perform a single contract for the installation of 4,000 feet of silt fence. Enfield Enterprises then continued on to contract with KBR for 43 separate contracts to perform repairs on over 100 buildings. Permanent and temporary roofing and siding was provided, doors/garage doors and windows had to be restored, HVAC systems were entirely replaced, fire alarm and sprinkler system repairs were made, power and lighting was newly installed/replaced, and masonry rebuilds were needed along with many other tasks.

Enfield Enterprises was able to mobilize and deploy an administrative and management team of 25 to Tyndall AFB for this event within (3) days of notice. A total of over 250 workers were in the field at the peak of the event. Enfield Enterprises performed over \$25 million in construction repairs at the Tyndall AFB for KBR in a 4 month period to restore the base to pre-hurricane conditions. This experience was a pivotal point for Enfield Enterprise. It allowed them to expand their network at Tyndall AFB and with subcontractors in the area. New resources were developed not only for the disaster relief efforts but new permanent employees were recruited during that time who now occupy the Florida offices.
